#### **Section 6 Accidental Release Measures**

**Steps to be taken if Material is Released or Spilled:** Dispense sand, sawdust or vermiculite. Collect and place in waste container. Wash area thoroughly with water.

#### **Section 7: Handling and storage**

**Handling:** Use good hygienic practices (wash hands before eating, using bathroom or smoking). Under normal handling conditions, the risk of exposure to residual monomer is negligible. Monomer vapors can be generated when a product is heated during processing operation. Maintain adequate ventilation where product is heated or cured. Acrylic monomers can be detected by odor at a level far below existing or suggested work place exposure limits. Therefore, odor is not an indication of exposure problem or toxicity.

**Storage:** Store above 40°F.

#### **Section 8: Exposure controls and personal protection**

##### **Personal Protective Equipment:**

**Eye/Face Protection:** Wear splash goggles if contact with material is likely.

**Skin Protection:** Wear gloves if contact with material is likely.

**Respiratory Protection:** Not normally required with good ventilation.

**Engineering Controls:** Normal room ventilation.

#### **Section 9: Physical and chemical properties**

**Boiling Point:** 212°F
