<b>5. Fire-fighting measures.</b>	
<p><b>GENERAL INFORMATION</b> Use jets of water to cool the containers to prevent product decomposition and the development of substances potentially hazardous for health. Always wear full fire prevention gear. Collect extinguishing water to prevent it from draining into the sewer system. Dispose of contaminated water used for extinction and the remains of the fire according to applicable regulations.</p> <p><b>SUITABLE EXTINGUISHING MEDIA</b> The extinction equipment should be of the conventional kind: carbon dioxide, foam, powder and nebulised water.</p> <p><b>EXTINGUISHING MEDIA WHICH SHALL NOT BE USED FOR SAFETY REASONS</b> None in particular.</p> <p><b>HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE</b> Do not breathe combustion products (carbon oxide, toxic pyrolysis products, etc).</p> <p><b>SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS</b> Hardhat with visor, fireproof clothing (fireproof jacket and trousers with straps around arms, legs and waist), work gloves (fireproof, cut proof and dielectric), a depressurised mask with facemask covering the whole of the operator's face or a self-respirator (self-protector) in the event of large quantities of fume.</p>	
<b>6. Accidental release measures.</b>	
<p><b>PERSONAL PRECAUTIONS</b> Use breathing equipment if fumes or powders are released into the air.</p> <p><b>ENVIRONMENTAL PRECAUTIONS</b> The product must not penetrate the sewers, surface water, ground water and neighbouring areas.</p> <p><b>METHODS FOR CLEANING UP</b> Confine using earth or inert material. Collect as much material as possible and eliminate the rest using jets of water. Contaminated material should be disposed of in compliance with the provisions set forth in point 13.</p>	
<b>7. Handling and storage.</b>	
<p>Make sure that equipment is available for cooling the vessels, to prevent the danger of overpressure and overheating in the event of fire in the vicinity. Refer to the other sections of this data sheet for information relating to health and environmental risks.</p>	
<b>8. Exposure control / personal protection.</b>	
<b>8.1 Exposure limit values.</b>	
Not available.	
<b>8.2 Exposure controls.</b>	
<p>As the use of adequate technical equipment must always take priority over personal protection equipment, make sure that the workplace is well aired through effective local aspiration or bad air vent.</p> <p><b>HAND PROTECTION</b> Protect hands with category I (ref. Directive 89/686/EEC and standard EN 374) work gloves, such as those in latex, PVC or equivalent. The following should be considered when choosing work glove material: degradation, breakage times and permeation. Work glove resistance to preparations should be checked before use, as it can be unpredictable. Gloves' limit depends on the duration of exposure.</p> <p><b>SKIN PROTECTION</b> Wear category I professional long-sleeved overalls and safety footwear (ref. Directive 89/686/CEE and standard EN 344). Wash body with soap and water after removing overalls.</p> <p><b>RESPIRATORY PROTECTION</b> If the threshold value for one or more of the substances present in the preparation for daily exposure in the workplace or to a fraction established by the company's prevention and protection service is exceeded, wear a mask with an A or universal filter, the class (1, 2 or 3) of which must be chosen according to the limit concentration of use (ref. standard EN 141). The use of breathing protection equipment, such as masks with organic vapour and dust/mist cartridges, is necessary in the absence of technical measures limiting worker exposure. The protection provided by masks is in any case limited. If the substance in question is odourless or its olfactory threshold is higher than the relative exposure limit and in the event of an emergency, or when exposure levels are unknown or the concentration of oxygen in the workplace is less than 17% volume, wear self-contained, open-circuit compressed air breathing apparatus (ref. standard EN 137) or fresh air hose breathing apparatus for use with full face mask, half mask or mouthpiece (ref. standard EN 138).</p> <p><b>EYE PROTECTION</b> Use of protective airtight goggles (ref. standard EN 166) recommended.</p>
