TO WHOM IT MAY CONCERN:

Material safety data sheets have been developed for our glitter products. However, they are not required since our products meet the OSHA of an article:

"Article means a manufactured item (1)-which is formed to a specific shape or design during manufacture; (2) which has end use function (s) dependent in whole or in part upon its shape or design during end use; and (3) which does not release, or otherwise result in exposure to a hazardous chemical, under normal conditions of use."

This information is being furnished to answer any questions that may arise about the safety of our products.
