Safety data sheet according to 1907/2006/BC, Article 31

1 Identification of the substance/mixture and of the company/undertaking

- · Product identifier
- Trade name: Montana Black Ink red
- Registration number
 The ingredients of this ink have been pre-registered according to 1907/2006/EC (REACH)
- Relevant identified uses of the substance or mixture and uses advised against Currently no such applications are identified
 Application of the substance / the preparation alcohol based permanent marking ink

- Details of the supplier of the safety data sheet
- Manufacturer/Supplier: Georg Linz GmbH & Co.KG

Ceorg Linz Cambh & Co.KG Röthensteig 17 D-90408 Nürnberg Phone + 49(0)911/937719-0 Fax + 49(0)911/937719-44 info@linz-pen.de

2 Hazards identification

- · Classification of the substance or mixture
- Classification according to Directive 67/548/EBC or Directive 1999/45/EC

Xn; Harmful

Possible risk of irreversible effects.

Irritating to eyes.

F; Highly flammable

Highly flammable.

N; Dangerous for the environment

R51/53: Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.

• Information concerning particular hazards for human and environment:

The product has to be labelled due to the calculation procedure of the "General Classification guideline for preparations of the EU" in the latest valid version.

• Classification system:

The classification is according to the latest editions of the EU-lists, and extended by company and literature data.

- · Label elements
- Labelling according to BU guidelines: The product has been classified and marked in accordance with EU Directives / Ordinance on Hazardous Materials.
- Code letter and hazard designation of product:

Xn Harmful

F Highly flammable N Dangerous for the environment

- · Hazard-determining components of labelling:
- C. I. Solvent Orange 3
- · Risk phrases:
- Highly flammable.
- 36 Irritating to eyes. 51/53 Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment. 68 Possible risk of irreversible effects.
- · Safety phrases:
 - 29/56
- Reep out of the reach of children.

 Do not empty into drains, dispose of this material and its container at hazardous or special waste collection point.

4 First aid measures

- Description of first aid measures
- After inhalation: Supply fresh air; consult doctor in case of complaints.
- After skin contact: Immediately rinse with water.
- After eye contact:
- Rinse opened eye for several minutes under running water. If symptoms persist, consult a doctor. After swallowing: If symptoms persist consult doctor.
- Information for doctor:

- Most important symptoms and effects, both acute and delayed
 No further relevant information available.
 Indication of any immediate medical attention and special treatment needed
 No further relevant information available.

5 Firefighting measures

- Extinguishing media
- Suitable extinguishing agents: CO2, sand, extinguishing powder. Do not use water. For safety reasons unsuitable extinguishing agents:

- water Water with full jet Special hazarda arising from the substance or mixture No further relevant information available.
- Advice for firefighters
- Protective equipment: No special measures required.

6 Accidental release measures

- Personal precautions, protective equipment and emergency procedures Wear protective equipment. Keep unprotected persons away. Wear protective clothing.

 Ravironmental procautions:

- Do not allow product to reach sewage system or any water course.

 Prevent seepage into sewage system, workpits and cellars.

 Inform respective authorities in case of seepage into water course or sewage system.

 Do not allow to enter sewers/ surface or ground water.

 Methods and material for containment and cleaning up:

 Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust)

Dispose contaminated material as waste according to item 13. Ensure adequate ventilation.

Do not flush with water or aqueous cleansing agents

Do not flush with water of agreed the sections Reference to other sections See Section 7 for information on safe handling. See Section 8 for information on personal protection equipment.

See Section 13 for disposal information.

7 Handling and storage

- Handling:
- Precautions for safe handling
- Frecautions for usite mandling Ensure good ventilation/exhaustion at the workplace. Prevent formation of aerosols. Information about fire and explosion protection: Keep Ignition sources away Do not smoke.

- Protect against electrostatic charges.
- Conditions for safe storage, including any incompatibilities
- Storage:
- Requirements to be met by storerooms and receptacles: Store in a cool location. Information about storage in one common storage facility: Not required. Purther information about storage conditions:

- Keep container tightly sealed.

 Store in cool, dry conditions in well sealed receptacles.

 Specific end use(s) No further relevant information available.

8 Exposure controls/personal protection

- · Additional information about design of technical facilities: No further data; see item 7.
- Control parameters
- Ingredients with limit values that require monitoring at the workplace:

107-98-2 1-Methoxy-2-propanol (10-25%)

IOELV Short-term value: 568 mg/m³, 150 ppm Long-term value: 375 mg/m³, 100 ppm

- Additional information: The lists valid during the making were used as basis.
- Exposure controls
- Personal protective equipment:

Personal protective equipment:
General protective and hygienic measures:
Keep away from foodstuffs, beverages and feed.
Immediately remove all soiled and contaminated clothing
Wash hands before breaks and at the end of work.
Avoid contact with the eyes.
Avoid contact with the eyes and skin.
Respiratory protection:
In case of brief evrosure or low pollution use respirate

case of brief exposure or low pollution use respiratory filter device. In case of intensive or

longer exposure use . Protection of hands:

Protective gloves

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.

Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture.

Selection of the glove material on consideration of the penetration times, rates of diffusion and

the degradation

the degradation

Material of gloves

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

Penetration time of glove material

The exact break trough time has to be found out by the manufacturer of the protective gloves and has to be observed.

11 Toxicological information

- Information on toxicological effects
 Acute toxicity:
- · LD/LC50 values relevant for classification:
- 989-38-8 C.I. Basic Red 1
- Oral | LD50 | 250 mg/kg (rat)
- Primary irritant offect:

- on the skin: No irritant effect. on the eye: Irritating effect. Sensitization: No sensitizing effects known.
- Additional toxicological information:
 The product shows the following dangers according to the calculation method of the General EU Classification Guidelines for Preparations as issued in the latest version:

12 Ecological information
