In response to periodic requests for information, please be advised that:

PRESSURE SENSITIVE TAPE PRODUCTS MANUFACTURED AND SUPPLIED BY ANCHOR CONTINENTAL ARE NOT REQUIRED TO HAVE A MATERIAL SAFETY DATA SHEET.

The Hazard Communication Standard established by the Occupational Safety and Health Administration (OSHA) under paragraph 1910.1200 has as its' stated purpose:

...to ensure that the hazards of all chemicals produced or imported are evaluated, and that information concerning their hazards is transmitted to employers and employees. This transmittal of information includes...material safety data sheets...

Paragraph 1910.1200 does not apply to "articles". Within the HazCom Standard, an "article" is defined as:

"ARTICLE means a manufactured item other than a fluid or particle: (i) which is formed to a specific shape or design during manufacture; (ii) which has end use function(s) dependent in whole or in part upon its shape or design during end use; and (iii) which under normal conditions of use does not release more than very small quantities, e.g. minute or trace amounts of a hazardous chemical (as determined under paragraph (d) of this section), and does not pose a physical hazard or health risk to employees."
