SECTION VI: H	EALTH HA	ZARD	DATE			,		
Route(s) of Ent	ry: Inhala	ion? Y	es	Skin? No		Ingestion? No		
Health Hazards(Acute and Chronic): Prolonged exposure to respirable silica ma cause delayed lung injury (silicosis).								
Silicosis is a for	m of disabling	pulmo	nary fibrosi	s which can be	progressive and may lead to	death.		
Carcinogenicity	: NTP?	No		OSHA Regul	lated? No	IARC Monographs? Yes		
IARC Monographs on the Evaluation of the Carcinogenic Risk of Chemicals to Humans (volume 42, 1987)								
concludes that there is sufficient evidence for the carcinogenicity of crystalline silica to experimental animals, and								
that there is limited evidence of the carcinogenicity of crystalline silica to humans.								
Signs and Symptoms of Exposure: Undue breathlessness, wheezing, cough and sputum production.								
Medical Sympton	oms <b>Aggrav</b> a	ited by	Exposure:	Pulmonary fun	cion may be reduced by inhal	ation of respirable		
crystalline silica. Smoking aggravates the effects of exposure.								
Emergency and First Aid Procedures: Eye Contact - Flush with water and contact physician immediately								
Skin Contact – Wash with mild soap and water. Inhalation – Move to fresh air.								
SECTION VII: PRECAUTIONS FOR SAFE HANDLING AND USE								
Steps to be taken in Case Material is Released or Spilled: Use dustless methods (vacuum) and place into a closable								
container for disposal, or flush with water. Do not dry sweep. Use a dust mask.								
Waste Disposal Method: Dispose of according to State and Federal regulations								
Precautions to be Taken in Handling and Storing: Practice good housekeeping. Avoid creating dust.								
SECTION VIII: CONTROL MEASURES								
Respiratory Protection: Use dust mask approved for mineral dust by NIOSH								
Ventilation: Appropriate engineering controls and work practices should be used to minimize exposure to dust.								
Protective Gloves: Optional Eye Protection: Optional								
Work/Hygenic					nize exposure to dust
