# Hanco Ink, LLC

151 Stanley Street, Elk Grove Village, IL 60007 847-952-1511

# **MATERIAL SAFETY DATA SHEET**

## I. PRODUCT IDENTIFICATION - CS-952

		NAPIM/HMIS Rating		
		Health	1	
<b>Review Date:</b> 2-1-2013		Flammability	1	
Print Date: 2-1-2013		Reactivity	0	
		Personal Protection	SC	
	0 - M	inimal 1 - Slight 2 - Moderat		ktreme
II. COMPOSITION/INFORMATION ON INGREDIENTS SC - Glasses, gloves, apron				
CHEMICAL NAME	% CAS # PEL	,	ГLV	
Proprietary				
III. HAZARDS IDENTIFICATION				
Routes of Entry:	Ingestion, Skin contact, Eye contact, Inhalation.			
Medical Conditions Aggravated:	Eye disease, Skin disease including eczema and sensitization, Respiratory disease including asthma and bronchitis.			
Immediate (Acute) Health Effec	t <u>s:</u>			
Inhalation:	Can cause minor respiratory irritation, dizziness, weakness, fatigue, nausea, and headache. Harmful! Can cause systemic damage (see "Target Organs)			
Skin Contact:	Can cause minor skin irritation, defatting, and dermatitis.			
Eye Contact:	Can cause minor irritation, tearing and reddening.			
Skin Absorption:	Minimal hazard in normal industrial use.			
Ingestion:	Irritating to mouth, throat, and stomach. Can cause abdominal discomfort, nausea, vomiting and diarrhea. Small			
	amounts of this product aspired (breathing			em during ingestion or
Target Organ Acute Toxicity:	vomiting may cause mild to severe pulmonary injury, possibly progressing to death. Eyes, Skin, Respiratory system, Central nervous system stimulation.			
Long-Term (Chronic) Health Effects:				
Carcinogenicity:	Contains a substance that is a possible cancer hazard based on high dose animal studies. No data available to indicate product or any component present at greater than 0.1% are suspected or listed as carcinogens. Not listed as a carcinogen by: NTP, ACGIH, or OSHA.			
Reproductive and Developmental Toxicity:	No data available to indicate product or any components present at greater than 0.1% may cause birth defects.			
Mutagenicity:	No data available to indicate product or any components present at greater than 0.1% is mutagenic or genotoxic.			
Inhalation:	Upon prolonged and/or repeated exposure, can cause minor respiratory irritation, dizziness, weakness, fatigue, nausea, and headache. Prolonged or excessive inhalation may cause respiratory tract irritation.			
Skin Contact:	Upon prolonged or repeated contact, can cause minor skin irritation, defatting, and dermatitis.			
Eye Contact:	Upon prolonged or repeated contact, can cause minor irritation, tearing and reddening.			
Skin Absorption	Upon prolonged or repeated exposure, minimal hazard in normal industrial use. No component(s) in this product are known to be absorbed through the skin.			
Target Organ Chronic Toxicity:	Skin, Respiratory tract, Central nervous system stimulation.			
Supplemental Health Hazard Information:	Individuals with pre-existing eye and skin disorders can be at greater risk.			
IV. FIRST AID				
Inhalation:	Remove to fresh air. If breathing is difficult, have a trained individual administer oxygen. Seek medical advice if symptoms persist			
Eyes:	Use an eye wash to remove a chemical from your eye regardless of the level of hazard. Flush the affected eye for at			

Item Numbers: 44239-9240

	least twenty minutes. Tilt the head to prevent chemical from transferring to the uncontaminated eye. Seek medical		
Skin Contact:	advice after flushing. Wash with soap and water. Get medical attention if irritation develops or persists.		
Ingestion:	Do not induce vomiting and seek medical attention immediately. Provide medical care provider with this MSDS. Induce vomiting as a last measure. Induced vomiting may lead to aspiration of the material into the lungs potentially		
Notes to Medical Personnel:	causing chemical pneumonitis that may be fatal. Aspiration during swallowing or vomiting may severely damage the lungs. If evacuation of stomach contents is necessary, use method least likely to cause aspiration. Pre-existing allergies or eczema		
V. FIRE FIGHTING MEASURE			
Flammability Summary:	Combustible		
Flash Point:	<b>93</b> °C <b>200</b> °F		
Fire Hazards:	Material may be ignited only if preheated to temperatures above the high flash point, for example in a fire. Can burn in fire, releasing toxic vapors. Container may explode in heat of fire.		
Extinguishing Media:	Use alcohol resistant foam, carbon dioxide, or dry chemical when fighting fires. Water or foam may cause frothing if liquid is burning but it still may be a useful extinguishing agent if carefully applied to the fire. Do not direct a water stream directly into the hot burning liquid.		
Fire Fighting Instructions:	Do not enter fire area without proper protection including self-contained breathing apparatus and full protective equipment. Use water spray/fog for cooling. Run-off from fire control may cause pollution. Fight fire from a safe distance and a protected location due to the potential of hazardous vapors and decomposition products. Frothing can occur if a water stream is used. Notify appropriate authorities if liquid enters sewers or other public waters. Heat may build pressure and rupture closed containers, spreading fire and increasing risk of burns or injuries. Water may be ineffective in fire fighting due to low flash point, low solvent density, and limited miscibility with water.		
Hazardous Combustion Products:	Carbon monoxide, Carbon dioxide, Nitrogen containing gases, Hydrogen chloride, Smoke, Toxic fumes.		
OSHA Flammability Class: DOT Flammability Class:	Combustible Liquid - Class III B Not Regulated		
VI. ACCIDENTAL RELEASE M	EASURES		
Health Consideration for Spill Response:	No health affects expected from the clean-up of this material if contact can be avoided. Follow personal protective equipment recommendations found in Section VIII of this MSDS. Ventilate the contaminated area. Poses little or no immediate hazard Remove soiled clothing and launder before reuse.		
Spill Mitigation Procedures: General Methods: Air Release:	Ventilate area of leak or spill. Wear appropriate personal protective equipment as specified in Section 8. Spills: Pick up and place in a suitable container for reclamation or disposal. Use an inert absorbent such as sand or vermiculite. Place in properly labeled closed container.		
Water Release:	Ventilate the area by opening door and/or turning on fans and blowers. Avoid runoff into storm sewers and ditches that lead to waterways. Do not flush to sewer. Notify authorities if entry		
Land Spills:	occurs. Retain all contaminated water for treatment. Avoid runoff into storm sewers and ditches that lead to waterways. Scoop up material and place in a disposal container. Absorb spill with inert material (e.g., dry sand or earth), then place in a chemical waste container. Wash		
VII. HANDLING AND STORAG	area with soap and water. Do not flush to sewer.		
Handling:	Mildly irritating material. Avoid unnecessary exposure.		
Storage:	Store in a cool dry ventilated location. Isolate from incompatible materials and conditions. Keep container closed when not in use. Keep away from sources of ignition. Store in a tightly closed container. Keep away from heat,		
VIII. ENGINEERING CONTROL	sparks, and flame. Do not store in direct sunlight. Store in a cool dry place. <i>LS AND PERSONAL PROTECTIVE EQUIPMENT</i>		
Engineering Controls:	Local exhaust ventilation or other engineering controls are normally required when handling or using this product to avoid overexposure. Ventilation should effectively remove and prevent the buildup of any vapor/mist/fume generated from handling this product.		
Protective Equipment:			
<b>Respirator Type(s):</b>	None required where adequate ventilation is provided. If airborne concentrations are above the applicable exposure limits, use NIOSH/MSHA approved respiratory protection.		
Eyes:	Wear safety glasses when handling this product. Wear chemical splash goggles if splashing or high-pressure system used.		
Skin:	Wear protective gloves. Inspect gloves for chemical break-through and replace at regular intervals. Clean protective equipment regularly. Wash hands and other exposed areas with mild soap and water before eating, drinking, and when leaving work. Use of protective coveralls and long sleeves is recommended. Launder contaminated clothing before reuse. Have a safety shower available. Contaminated clothing should be decontaminated then washed at a commercial laundry before reuse.		
	commercial laundry before re-use.		

#### IX. PHYSICAL DATA

Physical State: Odor:	Liquid Mild Resinous		
Evaporation Rate:	Slower than Butyl acetate		
Organic Volatiles, % by weight:	18.80		
Specific Gravity:	1.49		
Boiling Point:	Not Determined		
X. STABILITY AND REACTIVITY			
Stability Information:	Stable under recommended storage conditions.		
Conditions to Avoid:	Temperatures above flash point in combination with sparks, open flames, or other sources of ignition.		

Chemical Incompatibility: Strong oxidizing agents.

Hazardous Decomposition Products: Under normal conditions of storage and use hazardous decomposition products should not be produced.

## XI. TOXICOLOGICAL INFORMATION

No data available.

For toxicological information on the individual components, please call.

#### XII. ECOLOGICAL INFORMATION

**Overview (for ingredients):** This material is not expected to be harmful to the ecology. No ecological information available. Keep out of waterways.

## XIII. DISPOSAL CONSIDERATIONS

Disposal Methods: Dispose in accordance with Federal, State, Provincial, and Local regulations. Materials may be compatible with industrial waste incineration or inclusion in a fuel blending program. This characterization is subject to approval by your waste management contractor. This material should be recycled if possible.

### XIV. TRANSPORTATION INFORMATION

Packaging and shipping of this material should be done in accordance with DOT and other applicable Federal and International Regulations.

#### XV. REGULATORY INFORMATION

**CONEG Legislation:** 

No CONEG metals are present above regulated limits

U.S Toxic Substance Control Act: All components of this product are either listed on the U.S. Toxic Substances Control Act (TSCA) inventory of chemicals or are otherwise compliant with TSCA regulations.

XVI. ADDITIONAL INFORMATION The information in this Material Safety Data Sheet should be provided to all who will use, handle, store, transport, or otherwise be exposed to this product. This information has been prepared for the guidance of plant engineering, operations, and management and for persons working with or handling this product. The information presented in the MSDS is premised upon proper handling and anticipated uses and is for the material without chemical additions/alterations. We believe this information is up-to-date as of the date of publication and provide it in good faith, but make no warranty of any kind with respect to such information on this product.

Hanco Ink, LLC warrants only that its products consist of its published specifications. Hanco Ink, LLC does not make any (other) warranty, expressed or implied, including warranty of merchantability or warranty of fitness for a particular purpose and does not assume any liability resulting from the use of its products. Users should make their own investigation to determine the suitability of the information and the products for their particular purpose. We cannot guarantee results on all types of presses, stocks, etc., and we assume no liability in connection with the use of these products. In no event shall Hanco Ink, LLC be liable for any claims, losses, or damages of any third party or for any special, indirect, consequential, exemplary or punitive damages (including without limitation economic loss or loss of profits) of any kind of nature for any reason.
