Supplier Terry Ludwig Pastels, LLC
8113 W Brandon Drive
Littleton, Colorado 80125-9765

Manufacturer Terry Ludwig Pastels, LLC
8113 W Brandon Drive
Littleton, Colorado 80125-9765

For Chemical Emergency Call CHEMTREC 1(800)424-9300
For ingestion Call Your Local Poison Control Canter

Section 2, Hazard(s) identification

NFPA Classification	HMIS Classification
Health 0	Health 0
Flammability 0	Flammability 0
Instability 0	Reactivity 0
Special Hazards No known hazards associated with this product.	

Section 3, Composition/information on ingredients

Terry Ludwig Pastels Contain one or more of: Ultramarine blue (Pigment Blue 29)(CAS NO. 57455-37-5), Iron Oxide Black CI 77499 (CAS No. 12227-89-3), Chromium oxide green (CAS No. 1308-38-9), Bone black charcoal (CAS No. 8021-99-6), Burnt umber (CAS No. 12713-03-0), Burnt Sienna Ferric oxide [NF](CAS No. 12713-03-0), Raw Sienna/Limonite iron brown hematite (CAS No. 1317-63-1), Iron oxide yellow C.I. Pigment Yellow 42 (CAS No. 51274-00-1), Synthetic iron oxide Brown 6 (CAS No. 52357-70-7), Red Iron Oxide (CA S No. 1309-37-1), Yellow Ochre (CAS No.1343-81-3), Kaolin clay CAS No.1332-58-7), Quinacridone Pigment Violet 19 (CAS No.1047-16-1), Pigment Red 254 (CAS No. 84632-65-5), Pigment Yellow 151(CAS No. 31837-42-0), Pigment Violet 23 (CAS No. 6358-30-1), C.I. Pigment Green 50 (CAS No. 68186-85-6), Cobalt Blue (CAS No. 1345-16-0), Ferric Ferrocyanide (CAS No. 14038-43-8), Pigment Blue 27 (Prussian blue)(CAS No. 12240-15-2), Titanium Dioxide, C.I. Pigment White 6 (CAS No: 13463-67-7), Barium sulfate Pigment white 21 (CAS No. 7727-43-7), Calcium carbonate (CAS No. 1317-65-3), Gum acacia; Gum Arabic (CAS No.9000-01-5) and xanthan Gum (CAS No. 11138-66-2).

Section 4, First-aid measures

EYE CONTACT : Flush eyes thoroughly with large amounts of water for at least fifteen minutes. Seek medical attention in the unlikely event that irritation occurs.

SKIN CONTACT: Wash with soap and water. Remove severely contaminated clothing and clean before reuse. Seek medical attention in the unlikely event that irritation occurs.

INHALATION: Remove to fresh air. Get medical attention if breathing is difficult.

INGESTION: Do not give anything by mouth to an unconscious person. Get medical attention.

Section 5, Fire-fighting measures

FLAMABILITY: 16 CFR 1500.44.OSHA/NFPA Flash Point of more than 93oC, shall not be included in Flammable or Combustible Material.

Section 6, Accidental release measures

SMALL SPILL: Place spilled material in appropriate waste containers for disposal.

LARGE SPILL: Place spilled material in appropriate waste containers for disposal.

Section 7, Handling and storage

HANDLING: Avoid exposure through the use of appropriate engineering controls and good industrial hygiene practices.

STORAGE: Store in a moderately cool, dry, well ventilated area away from direct sources of heat. Empty containers may contain residue, dispose of properly. Keep labelling visible..

Section 8, Exposure controls/personal protection

ENGINEERING CONTROLS: Local exhaust ventilation is recommended if dealing with large quantities.

PERSONAL PROTECTION: Safety glasses are recommended. Impervious gloves and clothing should be worn when gross contact is likely as when cleaning up large spills.

EXPOSURE LIMITS: None

Section 9, Physical and chemical properties

APPEARANCE: Pastels used for painting

FLAMABILITY: OSHA/NFPA Class Non-flammable

VISCOSITY Not applicable

Section 10, Stability and reactivity

GENERAL: Terry Ludwig Pastels are non-reactive.

INCOMPATIBILITY: None

Section 11, Toxicological information

Ultramarine blue (Pigment Blue 29)(CAS NO. 57455-37-5), No data are available in humans. Limited evidence of carcinogenicity in animals. **OVERALL EVALUATION:** Group 3: The agent is not classifiable as to its carcinogenicity to humans.[IARC] "A nuisance dust." [Sax] Safe in manufacture and use with the only known hazard being the evolution of hydrogen sulfide after contact with acid; it is not irritating, sensitizing, or mutagenic; [Ullmann]

Iron Oxide Black CI 77499 (CAS No. 12227-89-3), CFR Title 21: Food and Drugs Listing of color additives exempt from certification

Chromium oxide green (CAS No. 1308-38-9), Absence of toxic and carcinogenic effects after administration of high doses of chromic oxide pigment in subacute and long-term feeding experiments in rats. (FOOD COSMET TOXICOL 13:347-351,1975) Trivalent chromium is most appropriately designated a Group D -- Not classified as to its human carcinogenicity. Chromic oxide is a color additive in drug use, in printing fabrics and banknotes. It is also used in dyeing polymers; colorant for latex paints.

Bone black charcoal (CAS No. 8021-99-6), There is inadequate evidence in humans for the carcinogenicity of carbon black. There is sufficient evidence in experimental animals for the carcinogenicity of carbon black. There is sufficient evidence in experimental animals for the carcinogenicity of carbon black extracts. Overall evaluation Carbon black is possibly carcinogenic to humans (Group 2B). A4; Not classifiable as a human carcinogen. ACGIH

Burnt umber (CAS No. 12713-03-0), Permitted for use as an inert ingredient in non-food pesticide products; [EPA]

Burnt Sienna Ferric oxide [NF](CAS No. 12713-03-0), No ingredients in this product are hazardous as defined by the Department of Labor. Classification of carcinogenicity: 1) evidence in humans: inadequate; 2) evidence suggesting lack of carcinogenicity in animals. Overall summary evaluation of carcinogenic risk to humans is Group 3: The agent is not classifiable as to its carcinogenicity to humans.

Raw Sienna/Limonite iron brown hematite (CAS No. 1317-63-1), Large amounts of ferrous salts of iron are toxic but, in adults, fatalities are rare and almost exclusively suicidal. Most deaths occur in childhood and particularly between the age of 12 & 24 months As little as 1 to 2 g of iron may cause death, but 2 to 10 g is usually ingested in fatal cases. [Hardman, J.G., L.E. Limbird, P.B., A.G. Gilman. Goodman and Gilman's The Pharmacological Basis of Therapeutics. 10th ed. New York, NY: McGraw-Hill, 2001., p. 1500]

Iron oxide yellow C.I. Pigment Yellow 42 (CAS No. 51274-00-1), CFR Title 21: Food and Drugs Listing of color additives exempt from certification. Used as a food colorant; [JECFA] Permitted for use as an inert ingredient in non-food pesticide products; [EPA]

Synthetic iron oxide Brown 6 (CAS No. 52357-70-7), CFR Title 21: Food and Drugs Listing of color additives exempt from certification. may be safely used as diluents in color additive mixtures for food use exempt from certification.

Red Iron Oxide (CA S No. 1309-37-1), Toxicity

Organism	Test Type	Route	Reported Dose (Normalized Dose)	Effect	Source
dog	LDLo	subcutaneous	30mg/kg (30mg/kg)		"Abdernalden's Handbuch der Biologischen Arbeitsmethoden." Vol. 4, Pg. 1289, 1935.

Classification of carcinogenicity: 1) evidence in humans: inadequate; 2) evidence suggesting lack of carcinogenicity in animals. Overall summary evaluation of carcinogenic risk to humans is Group 3: The agent is not classifiable as to its carcinogenicity to humans IARC.

Yellow Ochre (CAS No.1343-81-3), No ingredients in this product are hazardous as defined by the Department of Labor.

Kaolin clay CAS No.1332-58-7), Kaolin ores may contain mica and silica. Kaolin workers may develop a simple or complicated pneumoconiosis with lung opacities and restrictive or mixed pattern on spirometry. [Sullivan, p. 544] Kaolin pneumoconiosis has been reported in miners, millers, and end users. [Rosenstock, p. 411] The highest exposures have been found in workers who process the clay (dry, mill, or load) rather than in end users. A study published in 1988 of 2000 U.S. kaolin workers found a prevalence for simple and complicated pneumoconiosis of 3.2% and 0.63%, respectively. [Rom, p. 531-2] A4; Not classifiable as a human carcinogen ACGIH

Quinacridone Pigment Violet 19 (CAS No.1047-16-1), Toxicity

Organism	Test Type	Route	Reported Dose (Normalized Dose)	Effect	Source
rabbit	LD	skin	> 2mL/kg (2mL/kg)	BEHAVIORAL: SOMNOLENCE (GENERAL DEPRESSED ACTIVITY) GASTROINTESTINAL: "HYPERMOTILITY, DIARRHEA"	National Technical Information Service. Vol. OTS0533795,
rat	LD50	oral	> 20mL/kg (20mL/kg)		National Technical Information Service. Vol. OTS0533794,

No ingredients in this product are hazardous as defined by the Department of Labor.

Pigment Red 254 (CAS No. 84632-65-5), Title 21 of the U.S. Code of Federal Regulations (21 CFR) Indirect Additives used in Food Contact Substances FDA

Pigment Yellow 151 (CAS No. 31837-42-0), PubChem: As a colorant in food-contact polymers, at levels not to exceed 5% by weight, including repeat-use polymers that may contact infant formula and breast milk.

Pigment Violet 23 (CAS No. 6358-30-1), Code of Federal Regulations Title 21, Certification of this color additive is not necessary for the protection of the public health, and therefore the color additive is exempt from the certification requirements of section 721(c) of the act.

C.I. Pigment Green 50 (CAS No. 68186-85-6), May cause skin sensitization; Prolonged inhalation exposure may cause serious adverse effects including cancer; [ToxPlanet: ECHA REACH Registrations] May cause irritation; May cause asthma, bronchitis, shortness of breath, and wheezing in sensitive individuals; Contains a possible carcinogen; [BASF MSDS]

Cobalt Blue (CAS No. 1345-16-0), Damage to the respiratory system is the primary health effect associated with occupational exposure to cobalt metal dust, causing shortness of breath, impaired lung function, wheezing, asthma, pneumonia, and noncancer lung diseases. Skin allergies have also been reported in workers that had direct skin contact with cobalt dust. While ingestion of small amounts of cobalt is essential to human health (inadequate intake is associated with anemia), limited data suggest that large oral intakes may lead to toxic effects in humans. Elevated cobalt intake has been associated with increased production of red blood cells, which could be lead to health problems in healthy individuals (polycythemia) or be beneficial in individuals with anemia.

Ferric Ferrocyanide (CAS No. 14038-43-8), Toxicity

Based on reported adverse events and mechanism of action, possible overdose symptoms may include constipation, obstruction, or severe decrease in electrolytes.[FDA; Center for Drug Evaluation and Research

Pigment Blue 27 (Prussian blue)(CAS No. 12240-15-2), May cause irritation; [MSDSonline] Ferrocyanide complexes are stable and practically nontoxic because of the strong bonding between iron and cyanide. Cyanide ions may be formed slowly when the chemical is irradiated with UV light. [Ullmann] Prussian blue is used as a medication in 500-milligram capsules to treat patients poisoned by thallium or radioactive cesium. [Reference #1]

Titanium Dioxide, C.I. Pigment White 6 (CAS No: 13463-67-7), There is inadequate evidence in humans for the carcinogenicity of **titanium dioxide**. Cancer in experimental animals: There is sufficient evidence in experimental animals for the carcinogenicity of **titanium dioxide**. Overall evaluation: **Titanium dioxide** is possibly carcinogenic to humans (Group 2B)[IARC] Toxicity

Barium sulfate Pigment white 21 (CAS No. 7727-43-7), opaque ingredient in a barium meal for x-ray diagnosis.

Calcium carbonate (Limestone) Chalk (CAS No. 1317-65-3), When large doses of NaHCO₃ and/or CaCO₃ were ... admin with milk or cream for the management of peptic ulcer, the milk-alkali syndrome (alkalosis, hypercalcemia, and renal insufficiency) occurred. Today this syndrome is rare and generally results from chronic ingestion of large quantities of Ca⁺² (five to forty 500-mg tablets per day of calcium carbonate) taken with milk. /Antacids/ [Brunton, L. Chabner, B. Knollman, B. Goodman and Gillman's The Pharmaceutical Basis of Therapeutics, Twelfth Edition, McGraw Hill Medical, New York, NY. 2011, p. 1316]

Gum acacia; Gum Arabic (CAS No.9000-01-5) Gum arabic is used as a suspending agent, excipient, and emulsifier in foods and pharmaceuticals. Toxicity

Xanthan Gum (CAS No. 11138-66-2). Corn sugar gum, a polysaccharide gum made by the bacterium *Xanthomonas campestris*; Used as a stabilizer and thickener for foods, pharmaceuticals, and cosmetics, for rheology control in water-based systems, and in oil and gas drilling; [Merck Index] Used as an anticaking agent, drying agent, formulation aid, coloring adjunct, processing aid, emulsifier, solvent, stabilizer or thickener, surface-finishing agent, and texturizer for foods; [FDA] Permitted for use as an inert ingredient in non-food pesticide products; [EPA] Used as a thickener for industrial formulations. A mild skin and eye irritant [Solvay MSDS]

Section 12, Ecological information

There is no evidence to suggest that it creates any significant ecological problem when released into the environment in small quantities.

Section 13, Disposal consideration

Contaminated product, soil, water, container residues and cleanup materials must be disposed of in accordance with all applicable federal, state and local regulations. This product is not identified as a RCRA hazardous waste under 40 CFR 261, and is not regulated under CERCLA (Superfund).
