

Liquitex Professional Spray Paint is a highly pigmented formulation, which provides incomparable color brilliance and is completely intermixable with the rest of our product range. As the Spray Paint is water-based, it is low-odor and safe for use indoors and outdoors; this also means that it may clog slightly easier than the high-solvent variety, so it's important to take precautions to avoid this.

PROFESSIONAL  
SPRAY PAINT™

**USE & CARE**

## 7 TIPS TO TAKE CARE OF YOUR SPRAY

1. Shake your can for one minute before use and continue to shake regularly during use. Doing so will help to keep the pigment evenly dispersed throughout the binder and prevent the cap from clogging.
2. Keep your can upright for optimum flow.
3. Use short, frequent sprays during use.
4. When you're finished, turn your can upside-down and spray until the cap runs clear. This will help to ensure that paint does not get stuck in the cap.
5. Always replace the cap cover after use to prevent drying out.
6. Always use a clean cap. With a dirty cap, paint will not flow fluidly, causing build-up and eventual clogging.
7. Use Liquitex Cap Cleaner after use to preserve the health of your spray caps. Just like an acrylic artist's paintbrushes, spray caps need to be cared for, and cleaning them after use can extend their life significantly.

## EXTEND YOUR CAP LIFE WITH LIQUITEX CAP CLEANER

Just like artist brushes, spray caps need to be cared for: cleaning after use can extend their life significantly.

## WHAT DO I DO IF MY CAP CLOGS?

If your cap does clog, do not continue to press down on it, as this will cause build-up under the cap and can damage your can. Follow two simple steps to salvage your can and cap:

1. Remove the cap from the can and spray Liquitex Cap Cleaner onto the dirty area. Then, wipe the can with a cloth.

2. If the paint inside the cap is still wet, clean your cap with Liquitex Cap Cleaner or soak it in soapy water to clear the well underneath.

If the paint inside has dried, you may purchase a replacement cap from the new selection of Liquitex Spray Accessories.

## HOW DOES LIQUITEX CAP CLEANER WORK?

Liquitex Cap Cleaner works in just a few seconds, and with three simple steps:

## HOW OFTEN DO I NEED TO USE LIQUITEX CAP CLEANER?

We suggest cleaning your caps after every use for the best results.

## 4 CAPS - UNLIMITED EFFECTS

With four caps to choose from, the Liquitex Spray Paint cap range provides artists with ultimate versatility. Start with a Regular Cap to map out your composition. Fill in large areas of color with our Fat Cap, and then focus on detail by switching to a Skinny Cap. Use a Calligraphy Cap to create calligraphy-style lines.

### LIQUITEX STANDARD CAP

MEDIUM LINE  
The most versatile, for creating outlines and fine detail

### LIQUITEX FAT CAP

THICK LINE  
For filling in large areas

### LIQUITEX SUPER SKINNY CAP

THIN LINE  
For adding fine detail

### LIQUITEX CALLIGRAPHY CAP

VARIABLE LINE  
For creating calligraphy-style lines
