2018-2019

Welcome to Blick's **2018–2019 Materials for Artists Catalog** — your introduction to the largest selection of high-quality, affordable art materials to be found.

Whatever you're looking for in the way of paints, brushes, drawing materials, ceramic tools, papers, canvas, frames, or the hottest trends, you'll find it here, online at DickBlick.com, or in our dozens of stores across the country. Look inside for great prices on your favorites — or on something completely new to you. With more than 90,000 products to choose from, we're pretty sure we've got what you're looking for. We also take pride in giving our customers the best support before, during, and after the sale — and that includes really quick shipping.

We've got some exciting news — the launch of Utrecht Cadmium-Free Artists' Oil Colors! As part of a continuing commitment to value, safety, and the working artist, Utrecht's team of scientists, artists, and paintmakers has applied its decades of paintmaking expertise to developing the world's first cadmium-free oil colors. Not only do these eight vibrant new oil colors perform like their cadmium counterparts, they offer improved color richness, increased brilliance, and balanced color spacing. You'll experience the same buttery texture, outstanding lightfastness, and high performance as the cadmium oils, in a way that's safe for your health and for the environment. Plus, the organic pigments used in their manufacture don't sacrifice the professional strength that artists require. Let us know what you think.

At Blick, we're relentless about staying on top of the latest arts and crafts trends — and that means getting you everything you need. Every Blick associate knows to send our internal Trend Task Force any product requests they hear from customers, fellow artists, even friends and family. So, whether it's a new glaze (like the Duncan Crackles Glazes on page 491) or makeup and sculpting essentials for cosplay or every day (see pages 506–507), we're happy to bring those products in. Just email us at productinfo@dickblick.com, tell a store associate, or call our Product Info team at 1-800-933-2542 (8 a.m.–5:30 p.m.).

As always, thank you for shopping at Blick. Be sure to connect with us on Facebook, Twitter, Instagram, YouTube, and Google+, and join our email lists for news about sales, events, contests, and more. Stay in touch.

Old Holland® Classic Oils

Old Holland has been making exceptional artist colors since 1664, using the same traditional formulas since the 17th century. Very concentrated, brilliant, and lightfast, these paints are made by hand using the very finest raw materials. Pigments are still ground on stone rather than with steel rollers, then blended with pure, first press linseed oil for optimal performance and archival permanence.

Williamsburg®

Williamsburg® Handmade Artist Oil Colors

The best raw materials in the world are used to make these paints. Pigments are carefully ground to enhance the beauty and luminosity specific to each, and then combined with pure, premium, alkali-refined and pH-balanced linseed oil. Every color in the line possesses a unique consistency and texture — some are slightly gritty, and some are extremely smooth. This is what makes Williamsburg Handmade Oils so unique and prized by the painters who choose them.

Williamsburg®

Williamsburg® Handmade Safflower Oil Colors

Williamsburg grinds its main line in linseed oil, which produces the strongest, most flexible, and fastest drying paint film. But knowing that linseed oil tends to yellow over time, the company also offers this series of white and transparent colors milled in fine safflower oil for a more enduring vibrance and clarity — ideal for passages of white and for glazing.

BLOCKX

Blockx® Artists' Oil Colors

Made in the tradition of the Flemish masters since 1865, Blockx Oil Colors are still ground by hand using a slowly rotating three-roll stone mill, and only pure pigments are used. All colors have a minimum lightfastness rating of 7 out of 8, so the entire line is considered perfectly lightfast. Iron oxides, earth pigments, and blacks are ground with linseed oil; all others are ground with poppyseed oil, which prevents yellowing and dries without wrinkling or mottling. No additives or fillers are used.

Color swatches are full strength and 50% tint.

M. GRAHAM & Co.

M. Graham® Artists' Oil Colors

For centuries walnut oil has been considered superior to linseed oil for producing rich, vibrant colors that resist cracking and are easier to manipulate. The walnut oil formulation of these free-flowing, slow-drying colors allows artists to create passages of finely blended color, jewel-like glazes, or full brush applications without adding solvents. Non-yellowing.

Michael Harding

Michael Harding Artists Oil Colors

Michael Harding Oil Colors possess an intensity equal to the handcrafted, limited edition oils produced prior to the invention of the collapsible paint tube in the 1840s. Formulated to the highest standards, they feature a high pigment load, offer excellent mixing power, and contain no fillers, extenders, or driers. Their consistency is silky, not oily, enabling artists to paint the thinnest layers or thick impasto brushstrokes with ease. The absence of driers ensures against brittleness, cracking, wrinkling, and yellowing.

SUPER FINE QUALITY

Van Gogh® Oil Colors

These pure-pigment paints are particularly easy to mix and work with because every color possesses virtually the same degree of gloss and viscosity, and dries at approximately the same rate. With good to excellent lightfastness, colors remain powerful and brilliant over time.

DA VINCI PAINT CO. DVP USA

Da Vinci™ Professional Fast-Dry Alkyds

Superior pigment concentration results in excellent handling characteristics. All 60 colors are permanent and have an ASTM lightfastness rating of I (excellent) or II (very good). A thin film dries to the touch in approximately 24–48 hours. No strong smell. Colors can be thinned with paint thinner or turpentine to lower viscosity and increase transparency, and can be mixed with linseed-based oil paints.

SENNELIER

Sennelier® Dry Pigments

Now, the very same pure pigments contained in Sennelier's oils, oil sticks, watercolors, soft pastels, and oil pastels are available to artists wishing to master the preparation of their own colors — in a wide array of unique colors of unsurpassed beauty and quality. Since the end of the 19th century, Sennelier has mined the Earth for minerals and other natural elements from traditional sources. That tradition continues today; however, recent research and innovations have also resulted in a variety of synthetic pigments that perfectly match the performance of ancient mineral pigments such as Lapis Lazuli and Cinnabar.

H Winsor & Newton™ Distilled Turpentine

All solvents vary in strength and in their capacity to "loosen up" the body of the color, but the solvent with the greatest power is distilled turpentine — the only solvent capable of easily dissolving damar resin. Keep the bottle tightly closed and away from light to prevent oxidation. Do not use Distilled Turpentine if it has thickened. Turpentine is flammable and toxic. Use only in a well-ventilated area.

Utrecht® Artists' Acrylic Colors

Among the first to develop and produce artists' acrylics, Utrecht has been making these professional-quality paints in Brooklyn, New York, since the late 1950s. Artists can count on Utrecht paints to maintain the same consistency, quality, and performance from batch to batch and year to year. Skilled craftspeople use only the finest pigments to create each and every color. Utrecht Artists' Acrylics offer excellent tinting strength, superior intensity and opacity, a buttery texture, and outstanding lightfastness.

"These acrylics offer excellent coverage, nice consistency, and a comparable (if not better) price than other artist-grade acrylics. I will definitely order them again."

Old Holland® New Masters Classic Acrylics

These paints are the innovation of Old Holland's late owner, Theo de Beer, who dreamed of developing a line of acrylics to be used by the "New Masters," just as Old Holland Oils had been used by the Old Masters. New Masters Acrylics are formulated using the finest new pigments available today combined with a pure acrylic "boutique" binder to ensure excellent adhesion, color retention, and working properties. They dry to a satin gloss finish, offer minimum brush drag, and contain no extenders or fillers.

For **250 ml (8.5 oz)** and **Liter (34 oz) jars,** visit **DickBlick.com.**

MATISSE STRUCTURE

Matisse Structure Acrylics

These acrylics have a rich, heavy body texture that's especially suited to impasto techniques. Apply them with a brush or palette knife to create striking textured effects. Made with maximum pigmentation — no fillers or extenders. Tubes feature innovative caps that both screw off and flip open. Larger 75 ml size offers 25% more paint than standard 60 ml tubes.

Golden® Heavy Body Matte Acrylics

Adding matte medium to acrylic paint will produce a matte surface, but this combination always decreases the color strength. To avoid this loss, Golden Heavy Body Matte Acrylics are formulated with a matting agent and a level of pigment that is comparable to Golden Heavy Body Acrylics. They dry to a uniform flat finish and produce a film with excellent flexibility and resistance to chemicals, water, and UV rays.

Lascaux® Studio Acrylics

An extremely versatile, concentrated acrylic paint for miniatures, murals, canvases, cards, and decoration. With high pigment loads and good coating flexibility, these brilliant, intense acrylics feature a creamy consistency and dry to a silky, matte finish that is weatherproof, waterproof, and non-yellowing. Colors are opaque and lightfast, vary minimally when dry, and will not bleed or change hue when overpainted. All colors mix easily with Lascaux Mediums and Lascaux Artist Acrylics.

Holbein® Fluid Acrylics

Holbein's low-viscosity fluid acrylic delivers exceptional brilliance and clarity in a smooth, free-flowing formula. It resists crazing, wrinkling, and foaming whether dripped, poured, sprayed, or applied with a brush. Produced using lightfast pigments and no fillers or extenders, it can easily be thinned to achieve watercolor-like effects and mixes seamlessly with all acrylic mediums including gels, pastes, and gesso.

Golden® Matte Fluid Acrylics

First created on a custom basis for artists requesting a pigment-saturated, low-viscosity acrylic paint, Golden Matte Fluid Acrylics require no thinning with water or mediums to achieve a wide variety of effects. Ideal for pouring, puddling, and dripping, they can also be used as an alternative to watercolors, for staining, and for effects that require spray application. For optimal tinting strength and coverage in an undiluted acrylic paint, Golden Matte Fluid Acrylics are an excellent choice.

Jacquard

A Jacquard® Lumiere Acrylics

Super-smooth Jacquard Lumiere Acrylics can be screened, stamped, stenciled, marbled, or printed to produce amazing, one-of-a-kind effects. They glide smoothly onto a variety of surfaces including wood, canvas, paper, fabrics — even soft, uneven textures such as Styrofoam™. Colors are opaque and bright, even on dark backgrounds.

Holbein® Artists' Watercolors

Imported from Japan, a country with the oldest professional watercolor tradition in the world, Holbein Artists' Watercolors are free of ox gall and other dispersants that inhibit optimum brush handling. This makes them ideal for painting in the Japanese watercolor tradition, where brushstrokes are often preserved. The moist, transparent colors have a consistent texture for mixing, with a color tone that remains brilliant even when watered down to light hues.

Old Holland® Classic Watercolors

Containing up to twice as much pigment as some other artist-grade colors, Old Holland Classic Watercolors are among the richest and thickest of watercolor paints. Pigments are ground using stone rollers rather than metal. All color making is done by hand, and all processes are controlled by artists.

Schmincke® Horadam® Gouache

Some brands offer gouache created with pre-mixed colors — Horadam Gouache is a "fine artist" gouache, created to provide artists with a range of pure, single pigment, classic colors. No white is added to artificially boost its covering power, allowing artists to create crisp color blends. All but eight of the 48 colors are based on a single pigment and are so finely ground they can even be used for 0.15 mm airbrush work.

Color swatches are full strength and 50% tint.

Holbein® Artists' Gouache

Holbein's opaque matte gouache is Japan's foremost designers' color medium. These paints deliver a brilliant, rich matte finish using naturally opaque pigments — no opaquing agents are added. This creates vibrant, exciting color that won't muddy when mixed. Truly professional grade, this gouache does not darken, bleed, or crack. Use it in dense opaque layers to build surface body, or thin it with water to semi-transparency.

SENNELIER

pastels á l'écu

Actual Size

In 1887, Gustave Sennelier, a chemist by trade, bought a small art supply store in Paris, France. He and his wife lived above the store, and Sennelier began grinding pigments for his own line of artists' colors. To further the development of his products, he consulted with artists, including Paul Cezanne, who was unknown at the time. At Edgar Degas' request, Sennelier created a line of pastels called à l'écu, named after a valuable gold coin of that era. Sennelier's store still exists today, located just across the Seine from the Louvre. Shoppers still rely on the Sennelier family to provide the quality materials that have become world famous. Sennelier pastels are made 100% from pigment and contain no fillers or clays. Only a minimal amount of binder is used, just enough to hold the pigments together as they are hand-formed, placed in special molds, and allowed to air-dry. Sennelier Soft Pastels are one of the softer pastels available, with a very smooth release of pigment that provides unusual depth and luminosity. Each full stick measures 2-1/2"L x 1/2"Dia. Half sticks measure 1-1/4" long. Extremely lightfast, these pastels are designed to hold their color for centuries.

Please order individual pastels in a minimum of 6 — may be assorted.

UNISON
UNISON USA A RICHESON CO.

soft pastels

British artist John Hersey began making his own handmade pastels in the 1980s, when he found that mass-produced, factory-made pastels simply did not offer the qualities he was looking for. Hersey worked out his unique color formulations over a decade of experimentation, creating intense, vibrant colors blended almost exclusively from pure pigment and water. During Hersey's handmade process, the sticks are rolled lightly and the pigments are hardly pressed at all, which makes them very fluid, like soft charcoal. Most manufacturers create their sets of colors by the simple addition of either black or white to the pigment mix. Hersey contends that this practice results in an isolated series of stepped reductions or tints that have no reference to a coloristic whole. Instead, he creates cycles of related hues to reflect the unions he sees in nature. Hence the name — Unison. Developed to be superior in color, texture, and response, Unison Soft Pastels are unlike anything on the market today. These standard pastels measure approximately 2-1/8"L x 5/8"Dia.

Terry Ludwig began experimenting with formulating his own pastels in 1995, with a goal of creating a vast array of colors that would be uniformly soft across all densities of hue. The result was the development of intense colors in unique hues that are not available in other pastel lines. Terry Ludwig's hand-crafted pastels contain a broad range of pigments and minimal natural binders, rendering them highly concentrated and velvety, while their square shape delivers thick, broad strokes and thin, precise lines. Individual pastels measure approximately 1-1/2"L x 1/2"Sqr.

pastels

Actual Size

How a pastel releases to paper depends on the individual pigments used and the base they're mixed with. Karl Kelly, Mount Vision's owner, has combined his technical expertise and artistic background, translating the vivid color and unique density of individual pigments into high-quality, affordable pastels. Each hand-rolled stick contains a unique combination of traditional and synthetic pigments to bring out their inherent beauty, enrich their undertones, and make each color sing. Combined in varying degrees with marble dust, chalk, and clay to assure a consistently smooth and buttery feel, the colors lay down with minimal resistance, allowing several layers to accrue without becoming too thick. 2"L x 1/2"Dia sticks.

ART SPECTRUM
Since 1966. Finest Artists' Colours
Made in Australia

Actual Size

Art Spectrum Soft Pastels provide the artist with colors that are pure, brilliant, and intense — and remain that way. The very best pigments are selected and triple-milled at maximum concentration to bring out the finest color and provide the rich, velvety texture valued by pastelists. This production method produces smoldering darks, brilliant and intense pure colors, and a range of subtle, delicate tints. All are free of heavy metals, asbestos, or other toxic substances. Pastels measure approximately 2-3/4"L x 1/2"Dia.

Art Spectrum® Extra Soft Square Pastels

This beautiful collection of square pastels includes everything from smoldering darks to delicate veils of highlight colors, every one exhibiting the rich velvety bloom loved by pastel artists. Soft and creamy, they lay down smoothly and blend beautifully. Their high-quality, lightfast pigments are triple-milled to bring out the intensity of each color, and a unique square shape allows for broad strokes, gestural marks, and fine details. Individual pastels measure 1/2" x 5/8" x 1-3/4".

DIANE TOWNSEND ARTISTS' PASTELS

soft form individual pastel sticks

Actual Size

Diane Townsend's palette of Soft Form pastels encompasses both classical artists' colors and an exotic and vivid range of modern pigments and mixes based on observation of color in nature and in paintings ranging from the Renaissance to contemporary art. Included are a specialty range of dark hues and off blacks; metallic, pearlescent, and iridescent colors; and grays and mauves that are mixed to give off a silvery light rather than being dull and flat. Hand-formed into pleasing one-of-a-kind sticks that contain no chalks or fillers, these pastels are available in light and dark shades. Newly formulated, they adhere better and produce less dust than before; plus, each pastel incorporates a binder and less pumice than before. This reduces the amount of dust released into the air, onto fingers, and onto other surfaces — extending the life of the pastels and making them more economical to use. Individual pastels measure approximately 1-3/4"L x 1/2"Dia.

Please order individual pastels in a minimum of 6 — may be assorted.

DIANE TOWNSEND ARTISTS' PASTELS

Diane Townsend Terrages pastels were originally developed to meet the desires of pastel painter Wolf Kahn. Each contains finely ground pumice stone that plows into the paper, creating a toothy surface on which to transfer complex layers of color and create a luminous sensation of depth and space. Terrages are formed into substantial rectangular slabs that can accept a more forceful application without crumbling. Made from the purest pigments available, they contain no chalks or fillers. Each pleasing, one-of-a-kind pastel measures approximately 1-3/4"L x 1"W x 1/4" thick. Each color is available in several shades.

artists' soft pastels

Holbein has developed an exceptional range of artist-quality soft pastels that offer great covering and blending power because of their soft powder richness. From inception to final production, Holbein's unique manufacturing process is computerized and mechanized. Every stick is scanned individually to guarantee even distribution of pigment and pigment purity, ensuring a predictably constant hue for use in sketching, undercoating, and finished work. Individually wrapped sticks feature a square shape for versatility — use the flat sides or sharp edges! Each stick measures 2"L x 1/2"Sqr.

Van Gogh® Pastels

From the makers of Rembrandt pastels, Van Gogh colors are hard, square-shaped pastels that are easy to use and produce very little dust. Richly pigmented, these pastels are ideal for sketching and tight drawing with the edge of the stick — or use the broad side to lay in large areas of color. Each stick measures 2-3/8"L x 5/16"Sqr.

Prismacolor® NuPastel Color Sticks

NuPastels have a rich, creamy texture that blends and shades easily. Frequently used in advertising layouts, NuPastels are stronger than ordinary soft pastels, which means less breakage and easier cleanup. Use them to create broad strokes and fine lines. Each stick measures 3-5/8"L x 1/4"Sqr.

Caran d'Ache® Pastel Pencils

The introduction of Caran d'Ache Pastel Pencils is a natural evolution in the company's long involvement with the demanding world of color. Features of these unique pencils include a large lead diameter (4.7 mm) with a strong point and a rich texture that adheres well to most surfaces. Creamy to apply, the pencils shade easily, while their hexagonal, rounded barrels reduce the risk of breakage from rolling off work surfaces.

Art Spectrum® Pastel and Multimedia Primer

Art Spectrum Pastel and Multimedia Primer provides a fine, positive tooth to hold extra color on your work (and less on the floor). Apply it with a dampened brush, sponge, or roller, straight from the pot. Brushes wash out in water. The same primers used on Colourfix Papers, these quick-drying acrylic primers bond solidly to almost any clean paper, canvas, card, plastic, glass, ceramic, or even metal. All colors can be intermixed to create new shades. White can be tinted with acrylics, Liquid Spectrum Inks, or Art Spectrum Gouache. Colors are permanent and non-toxic.

Sennelier® Oil Pastels

In 1949, Parisian painter Henri Goetz approached Henri Sennelier about creating a wax color stick for Pablo Picasso, a long-time Sennelier customer. Picasso needed a medium he could use on any surface, with no fading or cracking. The collaboration produced the Sennelier Oil Pastel. A blend of top-quality pigments, an extremely pure synthetic binding medium, and mineral wax make them bright, lightfast, and creamy to use, with high coloring/covering power. Regular size pastels are paper-wrapped and measure 2-5/8"L x 3/8"Dia. Grand pastels measure 5"L x 3/4"Dia, nearly eight times the weight and volume of regular size sticks. **Please order individual pastels in a minimum of 6 — may be assorted.**

Caran d'Ache® Neocolor® II Watersoluble Artists' Crayons

Softer than colored pencils, denser than children's wax crayons, and extremely responsive to a wet brush, Neocolor II Crayons are great for combining wet and dry techniques in the same drawing. Light colors will cover dark colors and vice versa, ideal for sgraffito. Soft enough to smudge with fingertips, these crayons are still much firmer than oil pastels. Sticks measure 4-1/8"L x 5/16"Dia.

Isabey® Series 6227 Pure Kolinsky Sable Round SHORT handle

The Isabey Kolinsky Sable Round series is the highest precision fine art brush available. Hand-selected Kolinsky Sable is sourced from Siberia during winter for the longest, most dense, and most luxurious hair possible. The hair is seated deeper in the nickel ferrule with less of its curve exposed, maximizing spring, snap, and control. The black lacquered wood handle is made to be balanced perfectly with the specific tuft size, making it easier to hold from almost any point on the handle.

Isabey® Series 6228 Pure Kolinsky Sable Round SHORT handle

Isabey's Series 6228 Kolinsky Sable Round is a slightly thinner-bellied version of the Isabey Series 6227 Kolinsky Sable Round. It combines precision with the ability to hold a large quantity of paint, for long or full brush strokes. The tuft of the brush is the smallest of any — 29 mm long and 25 mm around at the ferrule; the belly is 8 mm wide when wet. It has excellent resiliency that springs back to an incredibly sharp point.

Blick® Master Synthetic Kolinsky Rounds

SHORT handle

The carefully selected blend of uniquely patterned synthetic fibers in these brushes deliver everything you've come to expect from the finest natural hair watercolor brush — and more. When bundled with similar hairs, the wavy pattern creates a series of pockets between the fibers, trapping amounts of color not previously possible with other synthetic fibers. When combined with varying diameter fibers, the fibers mimic the water retention, spring, and pointing capabilities of natural hair. They also retain a more consistent shape over the life of the brush.

Blick® Master Synthetic Mongoose Rounds

SHORT handle

A distinctive brush made of five diameters and three lengths of an exclusive Polymide filament. Each strand is actually tapered to a precise tip much like a natural hair. The combination of multiple diameters and lengths allows for the formation of color-carrying pockets within the brush. The tapered tips make this the best-pointing synthetic available, especially in the larger sizes. The striking look of this brush is combined with the craftsmanship built into all of our Master Series watercolor brushes.

Robert Simmons®

Robert Simmons® White Sable

SHORT handle

The original synthetic artist's brushes for watercolor and acrylic are still guaranteed for life — just as they were when Robert Simmons introduced them in 1972. Simmons pioneered a revolution in synthetic brushes, creating a unique blend of filaments that performed so remarkably like pure Red Sable that they earned the name "White Sable." Superb point and spring at a fraction of the cost of Red Sable.

Escoda® Optimo Kolinsky Sable LONG handle

The fine Kolinsky Sable hair in these brushes forms a soft brush head, great for delicate, controlled work. Escoda's curing process makes the hair remarkably springy and resilient, and every brush has a lacquered wood handle for superb control. Blick® Masterstroke® Pure Hog Bristle Series

This series is one of our finest brush lines, and quite possibly the finest pure Hog Bristle you'll find anywhere. The very best craftsmanship goes into each brush — from the top-quality, hand-selected white bristle to the accent of gold on the tip of the long, matte black handles. The term "interlocking" refers to the abundance of natural flags, or splits, on the tips of the bristles — deep flags that lock together and produce a smooth stroke, even with heavy paints. Bristles are sorted by the natural curve of the hair and assembled so that the brush naturally retains its shape.

Escoda® Tadami Synthetic Mongoose LONG handle

Escoda's Tadami brush is one of the finest-crafted brushes we've seen. The synthetic filament is designed to simulate the feel of Mongoose hair, a favorite of painters for centuries. The brush head is stiffer than most synthetics, but it holds a remarkable point and isn't as stiff as a bristle brush. It's perfect for oils and acrylics of almost any consistency. The long gray-black lacquered wood handle is triple-crimped to the nickel-plated brass ferrule.

Winsor & Newton™ Monarch™ Synthetic Mongoose LONG handle

Stiffer than sable, softer than hog bristle, and more durable than natural mongoose, Monarch brushes are perfect for acrylic and oil painting. Robert Simmons® Titanium LONG handle

These synthetic brushes offer all the qualities of the finest Chungking interlocked hog bristle but can be used with all thicknesses of acrylic and oil paints. An interlocked process enables them to hold their shape while affording precise stroke control. They retain their sharp edge or point and their strength even when wet. Lacquered kiln-dried birch handles are resin bonded to crimped brass ferrules, which are coated with a solvent-resistant finish that resembles titanium. Lifetime guarantee.

Utrecht® Tuscan Series 206

LONG handle

Utrecht Tuscan Series brushes are made by skilled craftsmen who carefully blend the various silky filaments, then hand-set, interlock, tie, glue, and trim them for lasting performance. The handles are made from kiln-dried beechwood and stained a deep red color. These synthetic semi-firm brushes can be used with either oil or acrylic paints, and they're also a great choice for fluid or medium-body mediums. Ideal for smooth strokes, soft blending, transitions, and details, they can also be used for glazing and varnishing.

Blick® Studio Synthetic LONG handle

A synthetic brush that feels like genuine bristle! The result of years of development, these individual filaments have the extreme taper of natural bristle and are gently formed with heat to mimic a natural curve. Ideal for water-mixable oil paints, these brushes retain their stiffness in water. They are also less susceptible to the ravages of acrylic paint.

Princeton™ Aspen™ Series 6500 Synthetic LONG handle ECO Friendly

The synthetic bristles in Aspen brushes have the same stiffness as natural bristle but (unlike natural bristle) they stay together regardless of the surface or degree of pressure applied. Acrylics, oils, and watersoluble oils release and glide evenly off these bristles. Polished black handles are made from reforested wood, and matte black ferrules eliminate light reflection when painting on site.

Princeton™ Catalyst™ Polytip™ Series 6400 LONG handle

The tip of each hair has been split to replicate the natural flags on the finest natural bristle, giving Polytip bristles the ability to hold more paint while providing smoother application. These brushes are super stiff yet still extremely responsive. Designed for use with medium- to heavy-bodied acrylics as well as oil paints, they push even heavy gel mediums with assurance. And unlike natural hog bristle, which can become useless when water-soaked, they have real integrity in water.

Princeton™ Catalyst™ Blades LONG handle

Not quite a brush. Not quite a palette knife. Catalyst Blades are crafted from flexible silicone to give artists new tools for expression. Great with heavy-bodied paints such as oils, acrylics, and water mixable oils. Because they are heat-resistant, they excel with encaustics. Artists are using them with plaster, clay, and even frosting.

grounds & primers

Gamblin® Painting Ground

This lead-free painting ground is the top choice for a new generation of oil painters. The binder in Gamblin Ground makes it more flexible and faster-drying than lead/linseed oil grounds, which must dry for six months. Gamblin is ready for painting within a week. It makes canvas and linen stiffer than acrylic gesso and more flexible than traditional oil primers. Because the percentage of pigments is so much higher than in gesso, painters only need to apply two coats of Gamblin Ground instead of the recommended four coats of acrylic.

Q: Why buy an air cleaner?

A: We think the reasons are elementary. Indoor air may be up to 100 times more polluted than outdoor air. Combine that with the dust particles associated with pastels or paint, and adverse reactions may follow after prolonged exposure. Ted Rickard, health and safety manager at the Ontario College of Art & Design, says the hazards facing artists are gradual: "Artists tend to absorb the chemicals they use in small doses, which leads to chronic, low-level poisoning." Painters who work in poorly ventilated spaces can inhale harmful fumes from cleaning and thinning agents such as xylene and turpentine. The heavy metals that make for rich, beautiful paint — elements such as cadmium, chromium, and nickel — can damage internal organs when ingested and have been linked to cancer in some cases. Hobbyists are the least likely to take precautions. When it comes to preserving your health and that of your loved ones, an air cleaner is an excellent, low-cost investment. Take a look at the chart below for general guidelines about choosing the right model for your home or studio.

BLICK® premier belgian linen

Blick® Premier Belgian Linen Canvas — 1-3/8" Profile

Luxurious, flax-based fibers and expertly applied oil primer are meticulously combined to create this ultimate oil painting surface. Extremely smooth, medium texture (4.5 oz) linen is prepared, picked, and pumiced by hand in Belgium. Each canvas is then hand-coated in the USA with three applications of an oil-based, lead-free primer to reach a 10 oz primed weight. Finally, the canvas is hand-stretched and back-stapled around high-density pine stretcher bars with reinforced tenon corners for added strength. It's premier quality at an affordable Blick price.

BLICK® studio cotton

For students, hobbyists, and professionals on a budget, Blick Studio Cotton Canvas is the perfect choice when a lighter-weight stretcher bar is adequate. Finally, canvas is hand-stretched and back-stapled on solid wood stretcher bars in your choice of three profiles. For quality, dependability, and affordability, there's simply no better choice!

Ideal for watercolors

aquabord™

With an archival, acid-free, textured clay surface that absorbs watercolors like a fine paper, Aquabord allows colors to retain their purity and vibrancy in a way that even the finest watercolor papers can't match. Its unique surface is perfect for watercolors and gouache, needs no stretching, and will not tear, shrink, or buckle. Endlessly glaze and lift to underlying layers of color — or completely lift back to white without damaging the surface. Aquabord is also ideal for casein, acrylics, and more. Unlike paper, it can be sealed and displayed glass-free, keeping colors and textures true to life.

UArt Dark Sanded Pastel Paper is the perfect surface for those artists looking for a dark sanded substrate. It accepts many layers of hard or soft pastels, colored pencils, and other media, with a low-profile surface that allows for easy erasing. The color of the paper fluctuates depending on the grit — the higher the grade, the smaller the pigment. The 400 and 500 grit provide a rich, dark black color, and the 600 and 800 grit tend toward a charcoal color. The 9" x 12" pads hold 10 acid-free, pH-neutral sheets with glassine between each sheet to protect your work. No fixative required!

Richeson® Gator Foam™ Premium Pastel Surfaces

The texture of this uniquely lightweight yet sturdy pastel board is like no other, achieved by applying a "sanded" pastel surface directly to Gator Foam, a rigid board that is virtually weightless. The result is a surface that is easy to transport and able to be mounted as a finished work of art. Apply pastels with ease — Gator Foam will grab and hold the pigments layer after layer. It also works well with water media without compromising the surface or the integrity of the board. Archival and acid-free. 3/16".

Blick® Unmounted Battleship Gray Linoleum in Pre-Cut Pieces

Specially formulated for Blick, we import it from Europe several times a year to provide the softest quality possible. It gives a finely detailed, sharp, clear print. For best results, be sure your blades are sharp! Dull blades are dangerous and frustrating, especially to students. Because of the natural aging process, linoleum should be used within a year of its purchase to take advantage of its peak softness. For your convenience, we offer our 1/8" thick linoleum in pre-cut pieces, by the roll, and mounted on blocks.

Blick® Golden-Cut Unmounted Linoleum in Pre-Cut Pieces

All the benefits of traditional "Battleship" linoleum, but SOFTER!

It's softer and easier to carve — but maintains all of the qualities of traditional battleship gray linoleum. The fine-textured surface produces sharp, clear prints and won't distort when subjected to high pressure in the printmaking press. And the lighter golden color makes pencil marks easily visible — no need to paint the surface white. Finally, the inevitable hardening-with-age process has been significantly reduced with Golden-Cut Linoleum.

Soft-Kut® Printing Blocks

This rubber material won't skid away and doesn't need a bench hook to hold it down. It cuts without requiring much pressure or force. Block thickness is approximately 1/4" — thick enough to allow both sides to be cut, so you get two printing surfaces per block. Cut blocks into small pieces for rubber stamping. Use with waterbased inks.

Jacquard® Versatex Screen Printing Ink

These versatile, ready-to-use inks are ideal for silkscreening, stenciling, and block printing. Colors are intermixable and can be thinned with water. Though heavily pigmented, Versatex will not change the texture or softness of fabric, and will not wrinkle or bleed on paper. These semi-transparent inks are most luminous on light-colored fabrics. Use clear Color Extender for transparent overlays.

BLICK® squeegees

Blick Squeegees are manufactured to our high standards. Kiln-dried and precision-cut lumber is used for the non-warp handles, which are smooth, comfortably shaped, and easy to work with. The blades are molded under high heat and pressure and have a tensile strength of more than 2,000 lb, which eliminates ink streaking and provides a superior long-lasting printing edge. They're inserted into the wood handle and stapled in position, then professionally sharpened after assembly. Use for both graphic and textile applications, for all hand printing, and for many machine applications. Excellent abrasion and solvent-resistance. (Squeegee blade color may vary from image shown.)

BLICK® studio artists' colored pencils

"These colored pencils make it easy to lay down a consistent color over a large space. They don't wear down quickly, and the distinctions among colors are subtle but unmistakable. Fabulous, saturated colors!"

Derwent® Inktense Pencils

Versatile as watercolor pencils, but with a firmer texture that makes them perform with the brilliant intensity of pen-and-ink, these strong colors work beautifully on their own — or mix them together to create rich, subtle tones. Use them dry for intense color; wash them out with water for a translucent effect. When dry, the color is permanent and may be worked over with other media.

Derwent® Inktense Blocks

Just like your favorite Inktense pencils — in block form! Great for filling in large areas, the chunky shape makes both fine lines and broad strokes. Use them dry or wet for loose, expressive landscapes and still life paintings, rubber stamping, decoupage, or on fabrics for permanent color on silk paintings or quilts.

< Yasutomo® Traditional Chinese Inks

These traditional Chinese pigment inks have a dense black formulation that makes them suitable for all ink work, painting, drawing, and calligraphy. Lightfast and permanent, they can withstand wet mounting techniques. A convenient dual cap allows the ink to be poured from the top or the side of the bottle for added control. Ultra Black is a very dense, black, water-resistant ink that withstands wet mount processing. It contains extra carbon and works on porous and less porous papers, including metallic papers. It creates unique warm tones when thinned with water. Intense Black is a dense black ink with a less water-resistant formula than Ultra Black. It is formulated to create beautiful, warm Chinese tones in varying shades of gray with the addition of water. Conforms to ASTM D-4236. Note: Shake bottle thoroughly before using.

Walnut® Drawing Ink

Walnut Ink has a full, warm color that looks great with either a pen or brush and is very lightfast. The Walnut Drawing Stick is two tools in one — a bamboo-tipped nib on one end and a felt pen on the other. Change from drawing to washing with a twist of the wrist!

DANIEL SMITH® Walnut Ink

The warm character of walnut ink is reminiscent of drawings by Rembrandt. This rich, finely pigmented ink has a sepia color that resembles traditional walnut-based inks, but it will not fade. Use Walnut Ink for drawings with both dip pens and brushes. Because it's waterbased, it handles like a watercolor on washes, with good layering and lifting capabilities. 2 oz (59 ml) bottle.

Higgins® Ink Pump Markers

Higgins Black Magic and India Inks like you've never seen them before — in a pump marker! Ideal for use on papers and boards, Higgins Ink Pump Markers last seven times longer than most permanent markers. Choose a 1 mm bullet nib or brush tip. Both can be removed for refilling. India Ink produces a water-resistant finish, and Black Magic produces a quick-drying, waterproof finish. Both contain pigment ink that can be diluted with water and dries matte.

Prismacolor® Premier Double-Ended Art Markers

Create four line widths from one double-ended marker. Each marker has "click-fit" cap to prevent marker dry-out and nib damage, and each cap has an accurate color I.D. dot for easy identification. One end has an extra-broad nib that lays down color fast with paintbrush-like strokes, and the other end has a fine nib for sketching, detail work, or cleanup. Solvent-based ink is fade-resistant and water-resistant.

Chameleon™ Color Tones Markers and Refills

These innovative markers let you change the ink color right on the nib, to create different tones for highlighting, shading, blending — or to add depth, dimension, and texture. The double-ended markers have a super-soft brush on one end, and a bullet nib on the other. Simply insert either end into the mixing chamber, hold the pen in a vertical position, wait 10 seconds, then continue coloring. The color will start out as a lighter tone, then gradually become darker. Compatible with other alcohol-based markers, they are non-toxic and low-odor, perfect for working on paper crafts, manga, graphic design, and fine art. For set contents, visit DickBlick.com. A great value!

Place the mixing chamber filled with toning medium on top of either end of the pen. Gravity will pull the toning medium downward and infuse it into the pen nib.

Molotow™ Aqua Twin Markers

Intense, transparent colors that can be mixed to create new colors make Molotow Aqua Twin Markers great for graphic design, watercolor, and graffiti applications. Odorless, waterbased, and quick-drying, these double-ended markers contain food-based colorants that make them safe for children to use, too. The 2–6 mm chisel tip makes sharp lines, and the brush tip has a feel of a paintbrush. For set contents, visit DickBlick.com.

Pebeo® 4Artist Markers

Discover oil paint in the shape of a marker! Available in four tip sizes, the Pebeo 4Artist Marker range includes a variety of highly pigmented, vivid colors, and exceptional metallics. They offer scratch-free application, and a homogenous, paint-like finish with high fidelity from wet to dry. Just like oil paints, these fast-drying colors can be reworked when dry to create shading, fading, and color gradients. They're great for use on canvas, wood panels, or paper, for drawing, outlining, filling in large areas, glazing, mixed media, and more. Or saturate the tip with color to create splashing and dripping effects. Available individually in 2 mm, 4 mm, 8 mm, and 15 mm tip sizes. The 2 mm round tip is ideal for fine writing, drawing, finishing touches, and embellishments.

AMACO® velvet underglazes

Artwork by Nikki Mizak

Amaco® LEAD-FREE Velvet Underglazes

Cone 06–10 (1855°–2381°F)

Amaco Velvets are opaque underglazes that have a velvet appearance when left unglazed. Velvets will become opaque after three coats. When glazed with Transparent Matte glaze they will assume a soft, satin finish. The colors will intensify when covered with a Clear Transparent Gloss glaze, but will lose their matte surface quality. Velvets fire true to color from the jar and may be intermixed with other colors. Some colors vary at higher temperatures; visit DickBlick.com to view color variation chart at Cone 05 and Cone 10. All are sprayable and dinnerware-safe when applied and fired under Amaco LG-10 Clear Transparent glaze.

BLICK® essentials gloss glazes

"I'm a full-time studio potter and have used every major brand of glaze. This glaze series is my new favorite! It paints on smoothly, there's no settling or chunks, it fires true to the samples (even at Cone 5), and the results are vibrant and opaque. Yay, Blick!"

— Blick Customer from Savannah, Georgia

Blick® Essentials Gloss Glazes

Cone 06–05 (1828°–1888°F)

Blick Essentials Gloss Glazes come in a variety of bright, true colors that can be intermixed to create an infinite palette of colors. Non-toxic, non-hazardous, and food safe, these glazes glide smoothly onto bisque, with a self-leveling formula that eliminates brushstrokes from the fired finish. They dry quickly, speeding up handling time and allowing for the application of additional decoration. They also won't dissolve or pick up previous coats of glaze. Because they fire to a high gloss finish, no clear glaze is required. ACMI-certified. Pints.

Amaco® LEAD-FREE Artist's Choice Glazes

Dinnerware safe! Cone 05 (1911°F)

These special effects, semi-opaque oxidation glazes imitate the favorites of artisan potters, producing the look of high-fired reduction stoneware with less cost and trouble. Mayco® crystalites™

Mayco® LEAD-FREE Crystalites™

Cone 06–6 (1830°F–2269°F)

These gorgeous crystal glazes contain unique, magical potions of colors and rock-like crystals that produce dramatic effects when they flow and melt during firing. Apply to properly fired cone 04 bisque using a soft fan brush. Crystalites fire at cone 06, but can be fired up to cone 6. There's no need to fire the glazes any hotter to make the crystals flow, bloom more, or pattern better. Although food-safe when properly fired, they may not be practical for food containers due to surface characteristics. May be used in glaze combinations with other non-toxic glazes. Class Packs are a Blick exclusive. Not dinnerware safe.

Duncan® Metallic Glazes

Producing a range of polished finishes, from shiny to matte, Duncan Metallic Glazes transform ordinary surfaces into dramatic works of art. Use them for raku, or combine them with other Duncan glazes to create unique effects. They flow more freely when fired on vertical surfaces than other gloss glazes. Apply three to four flowing coats on Cone 04 bisqueware, then fire to Cone 04. Or use any glaze color as a base coat, apply wax resist, then apply Duncan Metallic Glazes to create metallic specks. Not overglaze-compatible. Do not use on greenware. Easy water cleanup. Not food-safe.

Duncan® Precious Metals Overglazes

Real precious metals applied to fired glazed ware as a final finish, these overglazes are opaque when applied, and result in brilliant 22 karat yellow gold or white gold finishes when fired. Bright Gold and White Gold contain 4 percent 22 karat gold content. Premium Gold contains 8 percent 22 karat gold content, producing a truer gold color. Fire to Cone 019-018. Follow instructions carefully for best results. Food-safe after firing.

Duncan® Crackles Glazes™

Specially formulated to create cracks that look like crazing on handmade ceramic pieces, Crackles Glazes produce a beautiful, aged look. Apply two coats to Cone 04 bisque, then fire to Cone 06. The crackle pattern will appear as the kiln cools, and continue to appear after the piece has been removed from the kiln. The crazed effect can be enhanced by applying India ink or thinned acrylic color with a soft cloth after firing. Non-toxic but not food safe. Most are overglaze-compatible. AMACO® WireForm®

Pliable enough to mold, yet sturdy enough to add structure to clays and modeling materials, WireForm works exceptionally well as a base for clay, plaster, and papier mâché. Made from specially manufactured metals that give it incredible flexibility and strength, WireForm's unique raised diamond strands expand to form three-dimensional shapes by simply molding, crimping, twisting, expanding, and gathering. Because it can be stretched into tight contours and shapes, it is ideal for detailed projects and delicate crafts. Heavier meshes are recommended for supporting sculptures using polymer clay or casting compounds.

Thibra Thermoplastic Sheets

Thibra is an innovative material used by professional artists, theater designers, hobbyists, and crafters for making costumes, masks, jewelry, décor, and more. Thibra is particularly popular within the cosplay and theater communities for making double-curved, sphere-shaped, and extreme shapes. This affordable, strong, tear-resistant material is easy to heat and shape using just a heat gun. Even after curing, objects can be adjusted and corrected by reheating them. Thibra's exceptionally smooth surface eliminates the need for priming, sanding, and filling. After curing, it can immediately be spray-painted, printed, or stamped. It can also be combined with other materials such as foam, felt, textiles, ribbons, leather, plaster, wood, and paper.

Black Ink™ Egyptian Papyrus Papers

ECO friendly

Papyrus is the oldest writing material in existence today, dating back at least 5,000 years. In fact, the very word "paper" is derived from its name. These light-colored sheets are formed by laying thin strips of plant stalk in horizontal and vertical (crosswise) layers. They have better mechanical strength than many modern papers of the same weight. Use them for writing, drawing, or painting. Paper sizes are approximate, and edges may or may not be frayed.

TERMS

PAYMENT - We accept personal and institutional checks, money orders, Blick gift cards, Blick gift certificates, PayPal, Amazon Payments, and VISA, MasterCard, Discover/ Novus, American Express, Optima, Diners Club, and JCB credit cards. No C.O.D. shipments. No individual open accounts. Schools, institutions, government agencies, and businesses with suitable credit may be extended net 30-day payment terms (with accompanying purchase orders) upon approval of a credit application. Customers who don't maintain accounts within terms are subject to suspension or cancellation of credit. Credit customers may opt to use our Customer Account Website (DickBlick.com/statements) for 24/7 access to account details, to download/view/print/email copies of invoices, and to pay invoices with a credit card or e-check. Credit customers may register to receive invoices and statements by email. For a credit application, or for any other credit inquiry, contact **credit@dickblick.com** or call **800.828.4548.**

CHECK POLICY - Upon receipt, your check may be converted into an electronic debit and processed according to Federal Reserve rules. Receipt of the check will be deemed to be your authorization for an Automated Clearing House debit entry to your account, which likely will be posted to your account the following day. If your check is dishonored or returned for any reason, we will electronically debit your account for the amount of the check plus a legal limit of a processing fee as per state law.

PRICES - All prices are subject to change without notice. We reserve the right to correct typographical errors in our catalogs. Due to volatility in world markets for paper, steel, and energy, it may be necessary for our suppliers to increase prices on some items. We will do our best to absorb these increases, but we may need to increase prices on some of our products as a result. In addition, if product-specific trade tariffs or duties are imposed, we may need to pass those increases along to you as well.

— What is MSRP? (aka "List Price") MSRP stands for Manufacturer's Suggested Retail Price (also known as "List Price"). MSRPs are published by the manufacturer of each product. Unless a product is our own brand, we do not set or inflate the MSRP. We report it. For our Blick and Utrecht brand products, we establish MSRP based on those of third-party vendors whose products most closely resemble ours in quality and size.

— Does a discount off the MSRP represent a sale price? Not necessarily. A typical example would be that a product has an everyday discount of 30% off the MSRP, but during promotional periods it may rise to 40% off the MSRP. Other products might be 40% and 50% off, respectively, and so on. Paint lines often use this type of model. Some products may never be promotionally priced. For more information about pricing visit: dickblick.com/customerservice/pricingpolicy

WRITTEN ORDER CONFIRMATION - When following up a phone, fax, or online order with a written order, please clearly indicate "Confirmation Only - Do Not Duplicate." The customer will be responsible for return freight and restocking charges for duplicate orders caused by failure to appropriately mark a written follow-up order.

SHIPPING INFORMATION

SHIPPING AND HANDLING CHARGES
Merchandise orders totaling $59 or more ship freight-free via FedEx Best Value whenever possible. Oversized or overweight orders will ship via a freight line. In those cases, the free freight offer includes curbside delivery only. Other services performed at the time of the delivery such as lift gate and inside delivery will incur additional charges. The average transit times will be extended for freight line deliveries and a delivery signature will be required. For all other orders, see shipping charges at left.
EXCEPTIONS: Additional shipping charges will be added to factory-direct (FOB) shipments, oversized or overweight orders that require lift gate and/or inside delivery; international and U.S. Territory orders; and shipments to Alaska, Hawaii, and Puerto Rico. Shipment of the following stocked art materials will be billed at an additional cost: linoleum rolls; stretched canvas 36" x 36" and larger; oversized panels; select oversized frames; any combination of clay, plaster, and molding material totaling 50 lbs or more; packages of foamboard; all GBC Classiccut Ingento Cutters and Trimmers; the Blick 906 Model II Etching Press, the Blick 999 Model II Etching Press, the Blick Master Etch Model II Press, and all Blick Model II Benches; all kilns and pottery wheels; and some shelters. Paper or boards may be assorted to reach the quantity of 10. Some stocked furniture items will be shipped by truck and billed at an additional cost.

SHIPPING METHODS - Depending upon the items ordered and destination, shipments to a residential address may be delivered by the local post office. Oversized or overweight orders may ship via freight line. In those cases average transit times will be extended and a delivery signature is required. Items shipped using FedEx Fast 2Day service will be received by the customer within two business days, and will be shipped via air or ground. Please note that hazardous items cannot be shipped to destinations outside the continental U.S.

Third Party Shipping Note - Due to our long-term history of significant shipping volume, Blick has already negotiated very favorable shipping terms with major carriers nationwide for small and large orders, as well as offering free shipping on orders that meet our minimum dollar value. Therefore, it is rarely advantageous to our customers for us to work through a third party shipping consultant or to ship and bill individual or corporate accounts.

Truck shipment delivers your item to your curb or dock. The charge varies and is based on distance, weight, bulk, and other factors. A physical address and destination phone number are required for delivery. The minimum charge is approximately $110. For an additional $35 a smaller truck with a lift gate will lower your merchandise from the truck to the ground. For an additional $25, your order can be moved from the curb to a ground-level location just inside your door. Delivery drivers cannot move items up or down stairs or to a specific location. Uncrating, disposing of packing materials, and installation are not included. Questions? Call **800.828.4548.**

FOB FACTORY AND OVERSIZED ITEMS - Items that include "YF" in front of the item number will, in most cases, be shipped directly from the factory and will not qualify for our free freight offer unless otherwise stated. Additional shipping charges do apply for these items. If you have any questions, call **800.828.4548**. Please allow additional time for delivery. Some items shipped directly from the factory may not be available for express shipping.

DAMAGE AND SHORTAGE - Count parcels and inspect the shipment before signing the delivery receipt. If damage or shortage is apparent, please note it on the delivery receipt along with the signature of the delivery driver verifying the same. Save the damaged carton for inspection purposes. **OPEN ALL PACKAGES IMMEDIATELY AND INSPECT YOUR MERCHANDISE TO SEE IF IT IS IN GOOD CONDITION.** If concealed damage (damage to materials inside a package with no external damage evident) is exposed, notify us at once. We must notify carriers within 15 days, or they may deny liability. Check merchandise against the packing slip. If an overage or shortage exists, or if there are any other problems with the order, notify Blick Customer Service at **800.723.2787** within 10 days after receipt of merchandise.

PAPER & BOARD ORDERS - When ordering sheets of paper or board larger than 18" x 24" in quantities of less than 10, a per order handling fee applies. Paper or boards may be assorted to reach the quantity of 10.

*** SAFETY LABELING**
The Art & Creative Materials Institute, Inc. ("ACMI") has been evaluating and certifying art, craft, and other creative materials to ensure that they are properly labeled. This certification program is reviewed by ACMI's Toxicological Advisory Board. Products bearing the AP (Approved Product) Seal of the Art & Creative Materials Institute, Inc. (ACMI) are certified in a program of toxicological evaluation by a medical expert to contain no materials in sufficient quantities to be toxic or injurious to humans or to cause acute or chronic health problems. These products are certified by ACMI to be labeled in accordance with the chronic hazard labeling standard, ASTM D 4236 and Federal law, P.L. 100-695 and there is no physical hazard as defined with 29 CFR Part 1910.1200 (c). Additionally, products bearing the AP Non-Toxic Seal meet specific requirements of material, workmanship, working qualities, and color described in appropriate product standards issued by ACMI or other recognized standards organizations. Products bearing the CL (Cautionary Labeling) Seal identify products that are certified to be properly labeled in a program of toxicological evaluation by a medical expert for any known health risks and with information on the safe and proper use of these materials. This Seal appears on only 15% of the adult art materials in ACMI's certification program and on none of the children's materials. These products are also certified by ACMI to be labeled in accordance with the chronic hazard labeling standard, ASTM D 4236 and the U.S. Labeling of Hazardous Art Materials Act.
ADDITIONAL HEALTH LABELING: CALIFORNIA PROPOSITION 65 - The state of California requires clear and reasonable warnings on products containing chemicals that have been shown to cause cancer, birth defects, or other reproductive harm. Even if these products contain only trace levels of harmful chemicals, a warning is required. Caution is recommended when using the products in this catalog that are marked with a Prop 65 label.

RETURNS - If you wish to return a portion of your order (which is small enough to ship via FedEx, UPS, or USPS), please do so within 30 days. Please include the packing slip or a copy of your invoice and a note advising us of the reason for the return. If you do not have either the packing slip or invoice, or if the return must be sent by truck, please call our Customer Service Department at **800.723.2787** for instructions, or email **custservice@dickblick.com.** Merchandise returned as a result of a customer order error will be subject to a 15% restocking charge.

AUDIO & VIDEO RETURN POLICY - We regret that we cannot give refunds on videotapes, CDs, and DVDs; all sales are considered final. In the event of a defective tape or disc, we will replace it with an identical program.

ASSEMBLY/INSTALLATION - Blick has no responsibility to unpack, crate, load, remove or dispose of debris, assemble, or install products.

Richeson® Art Panels

You'll spend less time priming and more time painting with Richeson pre-primed cotton and linen art panels. Saving you the time, effort, and mess of priming your own canvas, they make a great painting surface for use with oils, alkyds, acrylics, casein, and other waterbased paints. Each pH-neutral fiberboard panel is double coated with gesso, creating an archival barrier between panel and canvas. Three coats of acrylic primer on the canvas result in a painting surface that is archival, acid-free, and formaldehyde-free, with excellent adhesive qualities and a beautiful soft tooth finish. Choose from cotton or linen in the texture best suited to your next creation.
